PROFESSIONAL SUMMARY

Information Science Engineering graduate with hands-on experience in data analytics and machine learning through a Data Analyst internship and academic projects. Skilled in Python, SQL, Pandas, NumPy, Scikit-learn, Power BI and Streamlit, with experience in data preprocessing, exploratory analysis, predictive modelling and interactive dashboard development. Built and deployed ML and full-stack applications using real-world datasets and end-to-end development workflows. Seeking an entry-level role in software development, data analytics or data science and ML.

TECHNICAL SKILLS

- **Programming:** Python, SQL, JavaScript, C
- **Data Analytics:** Pandas, NumPy, Excel, Power BI, Matplotlib, Seaborn
- **Machine Learning:** Scikit-learn, Random Forest, Classification, Regression, Feature Engineering, Model Evaluation
- **Web & Backend:** HTML, CSS, Node.js, REST APIs, Streamlit, Django
- **Databases:** SQL, MongoDB
- **Tools:** Git, GitHub, Jupyter Notebook, VS Code
- **Core CS:** Object-Oriented Programming, DBMS, Computer Networks, Operating Systems

EXPERIENCE

Inventron Technologies, Bengaluru, India

February 2026 – May 2026

Data Analyst Intern

Telecom Customer Churn Analysis | Python, Pandas, NumPy, Scikit-learn, Streamlit

- Analyzed 7,043 telecom customer records across 20 input features using EDA and feature engineering to identify key churn patterns and customer segments.
- Built a Random Forest classifier achieving 80.27% test accuracy after preprocessing and categorical feature encoding.
- Developed an interactive Streamlit dashboard for churn prediction and retention suggestions.

PROJECTS

Admission Assistant: Rank-Based College Predictor

June 2025 – November 2025

Python | Pandas | Scikit-learn | Streamlit

- Analyzed 1,731 KCET college/branch records across 28 cutoff-related features to identify admission opportunities based on rank, category, branch and location.
- Developed a Random Forest-based admission prediction system with categorical feature encoding to generate college-wise admission probabilities.
- Built an interactive Streamlit application supporting cutoff-based filtering, ML-based prediction, user preferences and college/branch recommendations.

Online Car Rental Service

May 2024 – September 2024

Node.js | MySQL | JavaScript | REST API | JWT | HTML | CSS | GitHub

- Developed a responsive full-stack car rental platform with end-to-end workflows for vehicle search, booking and booking management.
- Implemented RESTful backend services using Node.js and MySQL with JWT-based authentication and protected API access for user sessions.
- Designed and implemented 5+ normalized relational database tables supporting users, vehicles, bookings and administrative operations.

EDUCATION

Bapuji Institute of Engineering and Technology, Davangere

2022-2026

B.E. Information Science and Engineering | **CGPA: 8.01 / 10.0**

Relevant Coursework: Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Machine Learning, Data Analytics

Vikasa Comp P U College, Shivamogga

2020 – 2022

Pre-University Course (PUC) – Science, 76.17%

CERTIFICATIONS

- Introduction to Cybersecurity – Cisco Networking Academy
- Power BI for Beginners – Simplilearn
- Introduction to AI – Infosys Springboard

LANGUAGES
